Subject: CVE-2023-50780: Apache ActiveMQ Artemis: Authenticated users could perform RCE via Jolokia MBeans

Message-ID: <29bb865f-eb19-1c72-f637-90e60e8f639e@apache.org>

Content-Transfer-Encoding: quoted-printable

Date: Mon, 14 Oct 2024 16:00:41 +0000

MIME-Version: 1.0

Severity: moderate

Affected versions:

- Apache ActiveMQ Artemis before 2.29.0

Description:

Apache ActiveMQ Artemis allows access to diagnostic information and controls through MBeans, which are also exposed through the authenticated Jolokia endpoint. Before version 2.29.0, this also included the Log4J2 MBean. This MBean is not meant for exposure to non-administrative users. This could eventually allow an authenticated attacker to write arbitrary files to the filesystem and indirectly achieve RCE.
