Hi John,

I don't think you can disable SSL certificate verification checks
in LDAPLoginModule but you could use a tool like stunnel to forward you SSL
traffic disabling certificate verification checks.

Regards,
Domenico

Hi John-

Yes, you can do this with a little code stubbing for your unit test.

WARNING: Do not ship any of these dummy test classes to production or =
other operational environments.

1. Create a dummy ssl socket factory class
2. Create a test class that extends the ActiveMQ LDAPLoginModule and =
override the openContext method
3. Pass an environment variable to the LDAP InitialDirContext pointing =
to your custom dummy ssl socket factory class:
env.put ("java.naming.ldap.factory.socket", =
NonVerifyingSSLSocketFactory.class.getName ());
4. Run tests using dummy ssl and localhost

ActiveMQ LDAPLoginModule openContext method:

=
<https://github.com/apache/activemq/blob/4ff78ddab993d62408c8e63ce63a63d575=7fe039/activemq-jaas/src/main/java/org/apache/activemq/jaas/LDAPLoginModule.java#L482>

Stack overflow: =

<https://stackoverflow.com/questions/52600211/how-to-programmatically-disable-certificate-hostname-verification-in-java-ldap-j>

Thanks,
Matt Pavlovich

Good morning.

Is it possible to disable SSL certificate verification checks (just for test purposes) - specifically the checks against SANs in the certificate - for LDAPS calls via the LDAPLoginModule?

Thanks

Capgemini is a trading name used by the Capgemini Group of companies which includes Capgemini UK plc, a company registered in England and Wales (number 943935) whose registered office is at No. 1, Forge End, Woking, Surrey, GU21 6DB.

This message contains information that may be privileged or confidential and is the property of the Capgemini Group. It is intended only for the person to whom it is addressed.
