```

I'm still confused. There's multiple broker configurations in the zip and questions about both static and dynamic discovery. For the sake of clarity, can we focus on just *one* issue? If possible, provide configuration for either static or dynamic discovery (i.e. not both) and ask questions that only deal with that particular configuration.

Also, please do not continue sending pptx files. Please use a more ubiquitous file format (e.g. txt, pdf, etc.), or better yet, just describe your use-case and the problem you're seeing directly in the body of the email as is customarily done on this mailing list. Folks providing support on this mailing list are doing so on a volunteer basis so it helps when folks needing support ask questions which are clear and concise as possible. Thanks!

```
