I haven't seen that before, can you supply your connection config for
jolokia. Also what version of Artemis are you using?

Hello,
I'm trying the new Artemis Console.
Installing it with jetty-home-12.0.14 and apache-artemis-console-1.0.0 was =
fine. I followed the details from https://activemq.apache.org/components/ar=
temis-console/documentation/
I only needed to tell jetty to use port 8162, as 8080 and 8161 were already=
 in use.
The connection to the broker could be added in the qui.
When the connection is used with a wrong username/password, the error messa=
ge "Incorrect username or password" appears as expected.
But with the right username/password, nothing visibly happens, and the foll=
owing error appears in the webbrowser console.
Uncaught (in promise) TypeError: window.crypto.subtle is undefined
    Ep crypto.ts:6
    b d0339a10.chunk.js:1.238
This happens for Firefox and Edge to rule out specific browser behavior.
Does this look familiar to anyone? Any hints?
thx!
Erwin
