These first three are related to Apache Geronimo. I don't know why these
would be reported for ActiveMQ Artemis. We don't ship any jars from
Geronimo so these are not valid:
   *   CVE-2008-5518 <https://github.com/advisories/GHSA-xm92-rf24-h74w>
   *   CVE-2009-0038 <https://github.com/advisories/GHSA-c372-x57p-6x7v>
   *   CVE-2009-0039 <https://github.com/advisories/GHSA-678x-xfp4-r92r>

I can understand CVE-2024-6763 because it does impact the version of Jetty
that we shipped in 2.37.0, but the CVE indicates the problem only occurs
for applications using HttpURI which we do not:

> The vulnerable component is the HttpURI class when used as a utility
> class in an application. The Jetty usage of the class is not vulnerable.

We don't ship/use logback so CVE-2023-6378 is not valid.

I can also understand CVE-2024-8184 because it also impacts the version of
Jetty that we shipped in 2.37.0, but the CVE indicates the problem only
occurs when using ThreadLimitHandler which we do not.

CVE-2024-47554 is not valid because the version of commons-io that we ship
in 2.37.0 is not vulnerable.

I'd say your scanning tool isn't doing a very good job. Only two of the
seven issues reported were even potentially problematic. Ultimately all of
these are false positives.

Out of curiosity, what scanning tool are you using, and what exactly are
you scanning? Did the tool provide any additional details to clarify
specifically why these CVEs were reported?

I strongly encourage you to report potential security vulnerabilities to
security@apache.org mailing lists first, before disclosing them in a public
forum. Please see the page of the ASF Security Team[1] for further
information and contact information.

you are certainly correct about newly discovered vulnerabilities, but once
a CVE is published, the cat is already out of the bag (no harm in
requesting a response)

A published CVE related to an artifact can also affect projects that
depend on it. Disclosing the affected dependent projects in a public forum
before they have a chance to provide a fixed version can cause security
issues to their users. No harm in requesting a response by using the
appropriate communication channels. Please see the page of the ASF Security
Team[1] for further information and contact information.
